Data analyst with a creative edge from my design background, focused on turning data into clear stories that support better decision-making. I work with SQL, Python, and visualization tools to uncover patterns, opportunities, and solutions that drive real business impact.

PROJECTS

Customer Behavior Analysis

Analyzed usage and sales data to identify behavioral patterns and optimize marketing strategies based on customer retention and acquisition

A/B Business Hypothesis Testing

Conducted an A/B experiment to evaluate and prioritize improvement hypotheses for an online store, using ICE and RICE metrics for data-driven decision-making

Mobile App Event Funnel Analysis

Evaluated user behavior throughout a conversion funnel, identifying stages with the highest user attrition and proposing improvements to the product experience
